DETAILED ACTION

1. This Office Action is in response to applicant's amendment filed on July 17, 2006.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 1-3 are rejected** under 35 U.S.C. 102(b) as being anticipated by US Pat No 1,548,269 to Hoffman.

Regarding claim 1, Hoffman discloses a door security latch comprising a jamb element (2) comprising a jamb base plate (3), and first and second constraining means (5 and 8) moveable independently from one another and being connected and extending from the jamb base plate.

The latch further comprises a door element (1) comprising a door base plate (10), engaging means (12), and retaining means (13).

As to claim 2, Hoffman illustrates that the engaging means comprises a projecting arm (12).

As to claim 3, Hoffman illustrates that the retaining means comprises a substantially spherical member (13).

Allowable Subject Matter

4. **Claim 4 is objected to** as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. **Claims 5,6, and 10-12 would also be allowed** because the claims depend from claim 4.

At the instant, Hoffman fails to disclose the first constraining element as described in claim 4.

Response to Arguments

6. The current amendment to claim 1, that the first and second constraining means are connected to and extend from the jamb base plate overcomes the previous rejection in view of De Mayo.

However, upon further consideration, since the applicant is still claiming just the first and second constraining means intended to be limiting the distance to which the door is opened, and the engaging means and the restraining means intended to be use for engaging the first constraining means and for maintaining the engaging means in connection with the first constraining means, respectively, a new rejection in view of Hoffman was made on the record.

Conclusion

7. Applicant's amendment, that the first and second constraining means are connected to and extend from the jamb base plate, necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See

Art Unit: 3676
